

Software Developer

Based in Ridgefield, CT, New York City, NY or Los Angeles, CA – US

Webedia Movies Pro is a leading provider of digital marketing solutions and services for the global cinema and entertainment industry. We specialize in developing innovative data, marketing and technology solutions. Our team consists of more than 150 professionals in NYC, LA, CT, Glasgow, Scotland and Paris, France.

We're building our team with entrepreneurial people who are passionate about entertainment and want to join a fast-growing company creating cutting-edge digital services.

We currently have an opening for a Software Developer to join our US-based engineering team, to build a new generation of software for the movie industry. Focusing on backend development and data management, your work will be central within the IT department: constructing modern tools for the data pipeline; increasing the quality of data; creating new opportunities for products and projects inside the company. You will be working in tandem with a team in the United States, as well as in Europe, under the supervision of the CTO.

What you'll do

- Analyze complex data quality requirements
- Develop the new data pipeline of the company as well as the necessary tooling to ensure data quality
- Provide feedback and input on current and future processes
- Participate in code reviews and best practice discussions

Requirements

- Proven experience in data processing
- Strong knowledge of ETL best practices
- Advanced knowledge of PostgreSQL
- Advanced knowledge of Python and NodeJS
- Unit testing, CI/CD experience

Additional valuable qualifications

- Experience in workflow management tools such as Airflow
- Knowledge of Cloud based solutions
- Experience in Kubernetes
- Polyglot programmer: you're not afraid to switch from one language to another if and when it makes sense

Benefits

- A company with continuous global career opportunities
- Work with highly motivated, skilled entrepreneurial people
